SIMTECH CONTINUES CLIMB IN THE 2021 INC. 5000 LIST

Huntsville, AL, August 17, 2021– Simulation Technologies, Inc. (SimTech), a Huntsville, Ala. based, woman-owned small business, is pleased to announce that we have once again been ranked in the Inc. 5000 Fastest-Growing Private Companies in America. This year, SimTech once more rose several places in the list over our ranking last year. SimTech was a winner in the Huntsville Chamber of Commerce “Best Places to Work” and in the Small Business in Technology of the year for 2020.

“SimTech growth is directly attributable to our tradition of responsive, quality support to our government customers and commitment to our employees. We were founded on the belief that small business offers innovations and efficiencies with agility to meet customer needs better than many larger businesses,” SimTech CEO Annie Saylor said.

For 38 years, SimTech has consistently provided quality engineering and technical solutions to the U.S. Army by means of radar and multispectral simulations, systems and test engineering, logistics, cyber security, and programmatic support. SimTech is an Express BPA holder, an OASIS prime contractor, and a recent awardee to the SEAPORT NXG contract.
